

# Aviation Operations

FOR THOSE WITH A NEED TO KNOW

4 1/2 Day Course

## PHYSICAL SECURITY

This course gives TSA aviation inspectors, cargo inspectors and general aviation facility professionals a well rounded education in professional physical security. This course will give you the required skills and information to advance your career and keep your facilities secure. This is also an excellent training opportunity for port security police.

### COURSE DESCRIPTION

This course is designed to provide regulatory inspectors with an in-depth knowledge of physical security procedures and equipment used in an airport environment. It will give you the advantage in knowing how an area or facility has been breached, giving greater detail about the level of an individual's skills, tools and mindset. This class will give you thorough understanding of how to secure a facility or an area to aid in crime prevention. The course was initially developed by LSI to assist in managing issues at critical infrastructure facilities and hubs for commercial transportation.
