

PROFESSIONAL SAFE LOCK OPENING

This hands-on course was developed for advanced technicians desiring safe opening and penetration skills. This course is designed to teach you the tools and skills to accurately locate and drill into a safe lock to defeat the lock without damaging the integrity of the malfunctioning safe.

Students will be instructed how to set-up and use safe opening and drilling equipment such as Lockmasters Little Black Box and JumpBox and fixed template drill and lever rigs. Barrier materials and the drill bits required to penetrate those barriers will be introduced to you. You will plan how to “attack” a safe with instructor supervision and make several openings over the three day period including: fence shot, borescope, internal relocker, external relocker, lever/bolt screw.

COURSE TOPICS

- Combination lock orientation, identification and specifics
- Establishment of safe type, construction & bolt work configuration
- Hardplate and material types
- Drill point determination & penetration of various hardplate materials
- Service & correctly repair drilled safes
- Non-drill methods for opening electronic safe locks include:
LaGard 33E, LG Basic II, S&G 6120, and more (time permitting)

PREREQUISITES: Electronic & Mechanical Safe Lock Servicing

* You can take an exam if you don't meet the prerequisite.

COURSE INCLUDES: Manual & Tool Kit

COURSE BENEFITS: LSI Diploma

COURSE LENGTH - 3 Days

TUITION - \$1,200.00

One Time Student Enrollment Fee - \$100

LOCATION - Kentucky
