Kaba Mas X-10 Operation & Troubleshooting

New Course - Don't let a technical problem turn into a lockout situation!

The Kaba Mas X-10 Operation & Troubleshooting course is a one-day, hands-on training program designed to help end-users and security personnel confidently operate, configure, and troubleshoot common issues associated with the Kaba Mas X-10 high-security electronic lock.

This course focuses on practical operation, general setup, user functions, and troubleshooting common technical errors that end users may encounter during normal operation. Students will gain a better understanding of the X-10's operating functions and learn systematic approaches for identifying and resolving common issues before they become larger operational problems.

This is a 1-day course designed for security professionals who need practical experience with X-10 operation, setup, common technical issues, and troubleshooting. Students will spend time working directly with X-10 locks in a hands-on training environment, reinforcing the skills needed to confidently operate these locks in the field.

Please note: It time allows we'll discuss the Kaba Mas X-09, which are still in the field.
